## **Algorithms for Image Processing and Computer Vision** J. R. Parker

A cookbook of the hottest new algorithms and cutting-edge techniques in image processing and computer vision

This amazing book/CD package puts the power of all the hottest new image processing techniques and algorithms in your hands. Based on J. R. Parker's exhaustive survey of Internet newsgroups worldwide, Algorithms for Image Processing and Computer Vision answers the most frequently asked questions with practical solutions.

Parker uses dozens of real-life examples taken from fields such as robotics, space exploration, forensic analysis, cartography, and medical diagnostics, to clearly describe the latest techniques for morphing, advanced edge detection, wavelets, texture classification, image restoration, symbol recognition, and genetic algorithms, to name just a few. And, best of all, he implements each method covered in C and provides all the source code on the CD.

For the first time, you're rescued from the hours of mind-numbing mathematical calculations it would ordinarily take to program these state-of-the-art image processing capabilities into software. At last, nonmathematicians get all the shortcuts they need for sophisticated image recognition and processing applications.

On the CD-ROM you'll find:

- \* Complete code for examples in the book
- \* A gallery of images illustrating the results of advanced techniques
- \* A free GNU compiler that lets you run source code on any platform
- \* A system for restoring damaged or blurred images
- \* A genetic algorithms package

### **From reader reviews:**

#### **Byron Jorgensen:**

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each reserve has different aim or even goal; it means that guide has different type. Some people sense enjoy to spend their time for you to read a book. They are reading whatever they consider because their hobby will be reading a book. Consider the person who don't like studying a book? Sometime, individual feel need book whenever they found difficult problem or exercise. Well, probably you should have this Algorithms for Image Processing and Computer Vision.

#### **Maurice Miller:**

As people who live in typically the modest era should be update about what going on or data even knowledge to make these people keep up with the era and that is always change and make progress. Some of you maybe can update themselves by examining books. It is a good choice for you personally but the problems coming to an individual is you don't know which one you should start with. This Algorithms for Image Processing and Computer Vision is our recommendation so you keep up with the world. Why, as this book serves what you want and want in this era.

#### **Santos Conrad:**

Information is provisions for folks to get better life, information presently can get by anyone on everywhere. The information can be a understanding or any news even restricted. What people must be consider any time those information which is within the former life are hard to be find than now could be taking seriously which one would work to believe or which one the resource are convinced. If you receive the unstable resource then you understand it as your main information you will see huge disadvantage for you. All those possibilities will not happen with you if you take Algorithms for Image Processing and Computer Vision as the daily resource information.

#### **Awilda Kell:**

The e-book with title Algorithms for Image Processing and Computer Vision has lot of information that you can discover it. You can get a lot of profit after read this book. This particular book exist new information the information that exist in this book represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This particular book will bring you within new era of the internationalization. You can read the e-book on the smart phone, so you can read the idea anywhere you want.
