Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994)

Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994)

The volume begins with an overview of POGIL and a discussion of the science education reform context in which it was developed. Next, cognitive models that serve as the basis for POGIL are presented, including Johnstone's Information Processing Model and a novel extension of it.

Adoption, facilitation and implementation of POGIL are addressed next. Faculty who have made the transformation from a traditional approach to a POGIL student-centered approach discuss their motivations and implementation processes. Issues related to implementing POGIL in large classes are discussed and possible solutions are provided. Behaviors of a quality facilitator are presented and steps to create a facilitation plan are outlined.

Succeeding chapters describe how POGIL has been successfully implemented in diverse academic settings, including high school and college classrooms, with both science and non-science majors. The challenges for implementation of POGIL are presented, classroom practice is described, and topic selection is addressed. Successful POGIL instruction can incorporate a variety of instructional techniques. Tablet PC's have been used in a POGIL classroom to allow extensive communication between students and instructor. In a POGIL laboratory section, students work in groups to carry out experiments rather than merely verifying previously taught principles.

Instructors need to know if students are benefiting from POGIL practices. In the final chapters, assessment of student performance is discussed. The concept of a feedback loop, which can consist of self-analysis, student and peer assessments, and input from other instructors, and its importance in assessment is detailed. Data is provided on POGIL instruction in organic and general chemistry courses at several institutions. POGIL is shown to reduce attrition, improve student learning, and enhance process skills.

From reader reviews:

Maxine Elam:

Information is provisions for anyone to get better life, information currently can get by anyone with everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider whenever those information which is in the former life are challenging be find than now is taking seriously which one works to believe or which one the resource are convinced. If you receive the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All those possibilities will not happen throughout you if you take Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994) as your daily resource information.

Mark Giordano:

Hey guys, do you would like to finds a new book to see? May be the book with the concept Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994) suitable to you? Often the book was written by popular writer in this era. The actual book untitled Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994)is one of several books that will everyone read now. This book was inspired many people in the world. When you read this book you will enter the new dimensions that you ever know prior to. The author explained their thought in the simple way, consequently all of people can easily to comprehend the core of this guide. This book will give you a large amount of information about this world now. To help you to see the represented of the world in this book.

Karen Plum:

The publication untitled Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994) is the guide that recommended to you to learn. You can see the quality of the reserve content that will be shown to anyone. The language that author use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, to ensure the information that they share to you is absolutely accurate. You also can get the e-book of Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994) from the publisher to make you much more enjoy free time.

Wayne Sutphin:

Spent a free the perfect time to be fun activity to try and do! A lot of people spent their leisure time with their family, or all their friends. Usually they carrying out activity like watching television, going to beach, or picnic in the park. They actually doing same thing every week. Do you feel it? Do you want to something different to fill your own free time/ holiday? May be reading a book could be option to fill your free time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to consider look for book, may be the guide untitled Process-Oriented Guided Inquiry Learning (POGIL) (ACS Symposium Series ; 994) can be fine book to read. May be it may be best activity to you.
