The Shape of Things to Come H. G. Wells

The Shape of Things to Come is a work of science fiction by H. G. Wells, published in 1933, which speculates on future events from 1933 until the year 2106. In the book, a world state is established as the solution to humanity's problems.

The Shape of Things to Come was written as a future history. Seen in retrospect, it can be considered as an alternative history, diverging from reality in late 1933 or early 1934, the point of divergence being US President Franklin D. Roosevelt's failure to implement the New Deal and revive the US economy and Adolf Hitler's failure to revive the German economy by rearmament. Instead, the worldwide economic crisis continues for thirty years, concurrently with the war.
