Build new Access cloud web apps and migrate desktop databases to the cloud

This is your complete, practical guide to creating Microsoft Access web apps and migrating existing databases to the cloud. Access MVP Andrew Couch guides you through the entire web app life cycle, from design through deployment and upgrades. After introducing Microsoft Office 365 and the web app development environment, he reviews key issues associated with moving data into a web app or creating cloud apps with new data. Next, he drills down into app construction, from table design to integration. You'll learn how to extend Access with Microsoft Azure SQL, PowerPivot, Visual Studio 2013, SQL Server Reporting Services (SSRS), and Apps for Office, and master important new enhancements in Office 365 SP1.

Learn best practices and techniques to:

- Capitalize on key Office 365 features in your Access web apps
- Design and integrate all the features of Access web apps
- Make your desktop databases compatible with web app table structures
- Implement and test business rules by using the Macro Programming Tools
- Understand how your app design translates to objects in the cloud-based Azure SQL Database
- Use Microsoft SQL Server Management Studio (SSMS) to connect with and manage web apps
- Improve reporting with PowerPivot, Visual Studio 2013, and SSRS
- Extend Access web apps with Apps for Office features
- Capitalize on Office 365 SP1 improvements in change deployment, intellectual property protection, and integration
