60 Years of CERN Experiments and Discoveries (Advanced Series on Directions in High Energy Physics) Herwig Schopper, Luigi Di Lella

The book contains a description of the most important experimental results achieved at CERN during the past 60 years, from the mid-1950s to the latest discovery of the Higgs particle. It covers the results from early accelerators at CERN to the most recent results at the LHC and thus provides an excellent review of the achievements of this outstanding laboratory. It reflects not only the impressive scientific progress achieved during the past six decades but demonstrates also the special way of successful international collaboration developed at CERN.

Readership: Physicists and graduate students in elementary particle physics.
