The Science of Snow Sports: Volume 4: Graphs & Data for Science Lab M. Schottenbauer

This book contains graphs showing the motion of scale models of skis and a snowboard as they travel on curved inclines. The surfaces, including slightly abraded HDPE/plastic and sheet metal, simulate Alpine slopes and a ski jump of different heights and shapes. A series of comparison graphs also show the motion of a set of wood blocks, a cylinder, and rubber ball, on similar curved surfaces. These comparison objects are also tested on a U-shaped, slightly abraded HDPE/plastic surface, such that the motion of the cylinder and rubber ball simulate oscillating movement reminiscent of the motion of a snowboarder in a half-pipe, although the model contains low, gradually sloping walls. These data can be used for lesson plans by teachers and parents.
