Climatology Robert V. Rohli, Anthony J. Vega

Instructors are often challenged when teaching a course such as Climatology because of the wide range of background in subject matter among the students. Climatology provides a thorough foundation in the processes contributing to the condition of the climatic system for students with little background while still providing the depth and rigor sufficient for the upper-level undergraduate or introductory-level graduate course. Beginning with an overview of climatology basics, an introduction to the atmosphere, and a discussion on climatology vs. meteorology, the authors guide students in a thorough study of advanced climatology issues. From the climatology of storms, global climatic change, and atmospheric teleconnections, topics are covered in a fresh and contemporary style. With its comprehensive approach and accessible format, Climatology will prove to be the ideal text for your course!
