Russia's Warplanes. Volume 2: Russian-made Military Aircraft and Helicopters Today Piotr Butowski

Following the success of the first offering in the series, Harpia Publishing presents the second volume of Russia's Warplanes, completing what has become a standard reference work on the subject. Once again researched and written by the acknowledged expert in the field, the book draws upon the author's unrivaled connections within the Russian aerospace industry to conclude this comprehensive directory of the country's latest military aviation hardware.

The result forms an essential companion to Volume 1, which detailed tactical combat aircraft, attack and transport helicopters, reconnaissance and surveillance aircraft, and special mission aircraft including airborne command posts and relay aircraft. Between them, the two works present in full detail the fixed-wing aircraft and helicopters that equip the various Russian air arms, as well as those developed for and operated by foreign states in the post-Soviet era.

Alongside technical descriptions for each military aircraft – and every significant sub-variant – currently available from Russia's aerospace industry, or otherwise in large-scale service, Piotr Butowski provides historical background and accurate data relating to production and operators around the world. Full coverage is extended to upgrades, as well as the new avionics and advanced weapons that these introduce.

The second volume in the series is dedicated to long-range bombers – including the Tu-95MS and Tu-160 that recently made their combat debuts over Syria – maritime patrol and antisubmarine warfare aircraft, strategic transport and tanker aircraft, theater transports, and trainers. The work provides authoritative accounts of Russia's current and future strategic bomber programs, as well as other fascinating types including the world's largest military transport, the An-124, and the new-generation Yak-130 advanced trainer and light attack aircraft.

In common with previous Harpia titles, the book contains a wealth of high-quality photographs, many of which have never previously been published.
