## **Space-Time Adaptive Processing for Radar, Second Edition** J.R. Guerci

Space-time adaptive processing (STAP) is an exciting technology for advanced radar systems that allows for significant performance enhancements over conventional approaches. Based on a time-tested course taught in industry, government and academia, this second edition reviews basic STAP concepts and methods, placing emphasis on implementation in real-world systems. It addresses the needs of radar engineers who are seeking to apply effective STAP techniques to their systems, and serves as an excellent reference for non-radar specialists with an interest in the signal processing applications of STAP.

Engineers find the analysis tools they need to assess the impact of STAP on a variety of important radar applications. A toolkit of STAP algorithms and implementation techniques allows practitioners the flexibility of adapting the best methods to their application. In addition, this second edition adds brand new coverage on “STAP on Transmit” and “Knowledge-Aided STAP (KA-STAP).”

### **From reader reviews:**

#### **Raymond Custer:**

Book is usually written, printed, or illustrated for everything. You can know everything you want by a e-book. Book has a different type. As we know that book is important factor to bring us around the world. Close to that you can your reading expertise was fluently. A book Space-Time Adaptive Processing for Radar, Second Edition will make you to end up being smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that will open or reading a new book make you bored. It is far from make you fun. Why they may be thought like that? Have you trying to find best book or acceptable book with you?

#### **Leona Tidwell:**

The book Space-Time Adaptive Processing for Radar, Second Edition will bring you to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book you just read, this book very suitable to you. The book Space-Time Adaptive Processing for Radar, Second Edition is much recommended to you to read. You can also get the e-book from official web site, so you can quickly to read the book.

#### **Richard Eby:**

The book with title Space-Time Adaptive Processing for Radar, Second Edition includes a lot of information that you can understand it. You can get a lot of advantage after read this book. This kind of book exist new know-how the information that exist in this publication represented the condition of the world today. That is important to you to find out how the improvement of the world. This particular book will bring you in new era of the the positive effect. You can read the e-book on the smart phone, so you can read the item anywhere you want.

#### **Clifford McDaniel:**

A lot of guide has printed but it takes a different approach. You can get it by world wide web on social media. You can choose the most effective book for you, science, amusing, novel, or whatever through searching from it. It is named of book Space-Time Adaptive Processing for Radar, Second Edition. Contain your knowledge by it. Without leaving the printed book, it could possibly add your knowledge and make anyone happier to read. It is most significant that, you must aware about guide. It can bring you from one destination to other place.
