**Antennas for Global Navigation Satellite Systems** Xiaodong Chen, Clive G. Parini, Brian Collins, Yuan Yao, Masood Ur Rehman

**This book addresses the fundamentals and practical implementations of antennas for Global Navigation Satellite Systems (GNSS)**

In this book, the authors discuss the various aspects of GNSS antennas, including fundamentals of GNSS, design approaches for the GNSS terminal and satellite antennas, performance enhancement techniques and effects of user's presence and surrounding environment on these antennas. In addition, the book will provide the reader with an insight into the most important aspects of the GNSS antenna technology and lay the foundations for future advancements. It also includes a number of real case studies describing the ways in which antenna design can be adapted to conform to the design constraints of practical user devices, and also the management of potential adverse interactions between the antenna and its platform.

Key Features:

- Covers the fundamentals and practical implementations of antennas for Global Navigation Satellite Systems (GNSS)
- Describes technological advancements for GPS, Glonass, Galileo and Compass
- Aims to address future issues such as multipath interference, in building operation, RF interference in mobile
- Includes a number of real case studies to illustrate practical implementation of GNSS

This book will be an invaluable guide for antenna designers, system engineers, researchers for GNSS systems and postgraduate students (antennas, satellite communication technology). R&D engineers in mobile handset manufacturers, spectrum engineers will also find this book of interest.

### **From reader reviews:**

#### **Dorothy Wild:**

This book untitled Antennas for Global Navigation Satellite Systems to be one of several books which best seller in this year, that is because when you read this reserve you can get a lot of benefit on it. You will easily to buy that book in the book retail store or you can order it by way of online. The publisher on this book sells the e-book too. It makes you quickly to read this book, because you can read this book in your Smart phone. So there is no reason to you personally to past this reserve from your list.

#### **Roxanne Jimenez:**

Are you kind of busy person, only have 10 as well as 15 minute in your moment to upgrading your mind skill or thinking skill also analytical thinking? Then you are having problem with the book compared to can satisfy your limited time to read it because this all time you only find guide that need more time to be learn. Antennas for Global Navigation Satellite Systems can be your answer since it can be read by anyone who have those short free time problems.

#### **Doris Rice:**

You may spend your free time to learn this book this publication. This Antennas for Global Navigation Satellite Systems is simple to bring you can read it in the park, in the beach, train and soon. If you did not have got much space to bring often the printed book, you can buy often the e-book. It is make you better to read it. You can save often the book in your smart phone. So there are a lot of benefits that you will get when you buy this book.

#### **Leif Etter:**

That reserve can make you to feel relax. This specific book Antennas for Global Navigation Satellite Systems was multi-colored and of course has pictures around. As we know that book Antennas for Global Navigation Satellite Systems has many kinds or style. Start from kids until young adults. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you personally and try to like reading this.
