It is epidemiologically oriented, with the most common and most important disorders listed first. This unique publication includes conditions that are common in primary care but that are not as well characterized inDSM-IV. Using an algorithmic format, "DSM--IV(R)--PC, International Version" assists practitioners in moving from presenting symptoms to diagnosis. Symptoms and features that discriminate among disorders are emphasized. Students and residents will also benefit from this new format, making this text an outstanding curriculum tool for medical education.
