Learn to build comfortable, long-lasting chairs. Chairs are ubiquitous, found in every home, office and building. Almost all are commercially made since many woodworkers shy away from making chairs, or even stools. Granted, there are not too many square parts to most chairs, and compound angles are somewhat intimidating. But the articles in this book, reprinted from "Fine Woodworking" magazine, should help dispel any questions or fears you may have about chair building. Not only can you build them, you can make them better than the average commercially made models.
