## Oculoplastics and Orbit (Essentials in Ophthalmology)

This second volume of the highly practical and informative work continues the fine tradition of this exceptional series. It details the latest concepts and management techniques in oculofacial plastic surgery. It contains in-depth reviews of orbital disorders such as capillary hemangiomas and venolymphatic malformations, offering new strategies in diagnosis and management. Coverage also includes recent developments in the diagnosis and management of lacrimal disorders, including salivary gland transposition for severe dry eye and lacrimal stenosis. It will prove to be a valuable resource for both the comprehensive ophthalmologist as well as subspecialists with a particular interest in disorders of the orbit, eyelids, lacrimal system, and other facial structures.
