Foundations of Quantum Group Theory

Dr Shahn Majid

Foundations of Quantum Group Theory Dr Shahn Majid

This is a graduate-level text that systematically develops the foundations of the subject. Quantum groups (i.e. Hopf algebras) are treated as mathematical objects in their own right; basic properties and theorems are proven in detail from this standpoint, including the results underlying key applications. After formal definitions and basic theory, the book goes on to cover such topics as quantum enveloping algebras, matrix quantum groups, combinatorics, cross products of various kinds, the quantum double, the semiclassical theory of Poisson-Lie groups, the representation theory, braided groups and applications to q-deformed physics. The explicit proofs and a great many worked examples and exercises will allow readers to quickly pick up the techniques needed for working in this exciting new field.

From reader reviews:

Carol Ray:

The publication untitled Foundations of Quantum Group Theory is the publication that recommended to you to learn. You can see the quality of the reserve content that will be shown to anyone. The language that publisher use to explained their way of doing something is easily to understand. The writer was did a lot of analysis when write the book, and so the information that they share for you is absolutely accurate. You also might get the e-book of Foundations of Quantum Group Theory from the publisher to make you far more enjoy free time.

Daniel Moore:

Often the book Foundations of Quantum Group Theory has a lot associated with on it. So when you read this book you can get a lot of advantage. The book was compiled by the very famous author. The author makes some research ahead of write this book. That book very easy to read you can obtain the point easily after looking over this book.

Michael Rahn:

That book can make you to feel relax. This book Foundations of Quantum Group Theory was colourful and of course has pictures on there. As we know that book Foundations of Quantum Group Theory has many kinds or variety. Start from kids until teens. For example Naruto or Private eye Conan you can read and think you are the character on there. So , not at all of book usually are make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading which.

Clara Radtke:

As a college student exactly feel bored to help reading. If their teacher asked them to go to the library in order to make summary for some guide, they are complained. Just little students that has reading's soul or real their passion. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that looking at is not important, boring as well as can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Foundations of Quantum Group Theory can make you feel more interested to read.
