Robert Appleton

A Tale of Two Sisters (The Steam Clock Legacy Book 2) Robert Appleton

Mystery and romance combine to spark an all-new adventure in the Age of Steam.

In a world where fleets of airships roam the skies and great towers of scientific learning pierce the clouds, the problems of two teenage sisters in Southsea, England will hardly make the headlines. After all, fending off suitors and going to bat for their family name won't exactly shake the empire to its roots. Right?

Wrong.

Meet the McEwans. First names Meredith and Sonja. One collects admirers, dispenses bad advice (and usually takes her own). The other's a bit of a tomboy, likes tennis and swings a mean forehand. They've only ever relied on each other; having a notorious explorer for a father has made them social pariahs. But these sheltered siblings are coming of age, and they aim to make a big impression.

While investigating the identity of a spy sent to watch her father, Meredith stumbles upon the existence of a powerful secret society in London. Despite the threats to her life, she is determined to infiltrate the sinister Atlas Club. Meanwhile, Sonja's budding romance with one of her schoolteachers turns both their worlds upside down. The still-unsolved mystery of Professor Reardon's time jump looms large over London, but the answer might be closer than they think, in the form of an unlikely new ally--a boy who doesn't quite belong...

They might not have much experience with love or espionage, but, like always, it's all or nothing for the McEwans. Win or fail, they're going to stir things up in the age of steam, and one way or another, everything's about to change.

Book Two of *The Steam Clock Legacy*.

94,000 words.

Also in The Steam Clock Legacy:

Prehistoric Clock

Yuletide Miracle

Tooth & Claw (short story)
