Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) I. M. Glazman, Ju. I. Ljubic

This remarkable book develops the subject of linear algebra in a novel fashion. A logically interconnected sequence of propositions and problems—some 2,400 in all—appears without proofs. Assisted only by hints and pointers, students must work out formal proofs systematically, proceeding from simple verifications to relatively advanced strategies and techniques of proof.

This volume also presents insights into functional analysis, which may be formulated as linear analysis without an infinite dimensional framework. As students allow their consideration of the propositions to move toward the limiting case of unrestricted dimensionality, they will find that their conceptual outlook approaches that which is suitable to functional analysis. In this regard, the book represents an introduction to the latter subject, free of the difficulties inherent in the explicit admission of infinities.

Based on the proposition that the best way to learn mathematics is to do mathematics, this approach will appeal to strongly motivated students. It can also be used as a resource for independent study and in cooperative seminars, as well as in conventional advanced undergraduate and graduate courses.

From reader reviews:

Beatrice Pearson:

Do you one among people who can't read gratifying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) book is readable through you who hate the perfect word style. You will find the facts here are arrange for enjoyable looking at experience without leaving perhaps decrease the knowledge that want to offer to you. The writer of Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) content conveys objective easily to understand by lots of people. The printed and e-book are not different in the content material but it just different as it. So , do you still thinking Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) is not loveable to be your top record reading book?

Juan Reynolds:

The actual book Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) will bring you to definitely the new experience of reading the book. The author style to elucidate the idea is very unique. In the event you try to find new book to read, this book very ideal to you. The book Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) is much recommended to you to see. You can also get the e-book in the official web site, so you can more easily to read the book.

Patricia McGuire:

Exactly why? Because this Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) is an unordinary book that the inside of the publication waiting for you to snap it but latter it will distress you with the secret this inside. Reading this book beside it was fantastic author who also write the book in such wonderful way makes the content inside of easier to understand, entertaining method but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of positive aspects than the other book get such as help improving your expertise and your critical thinking way. So , still want to postpone having that book? If I were you I will go to the e-book store hurriedly.

Carolyn Bailey:

Does one one of the book lovers? If yes, do you ever feeling doubt while you are in the book store? Aim to pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work is difficult job because you are afraid that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer might be Finite-Dimensional Linear Analysis: A Systematic Presentation in Problem Form (Dover Books on Mathematics) why because the fantastic cover that make you consider concerning the content will not disappoint a person. The inside or content is actually fantastic as the outside as well as cover.

Your reading 6th sense will directly show you to pick up this book.
