The Amazing Discoveries of Ibn Sina Fatima Sharafeddine

Born in Persia more than a thousand years ago, Ibn Sina was one of the greatest thinkers of his time — a philosopher, scientist and physician who made significant discoveries, especially in the field of medicine, and wrote more than one hundred books. As a child, Ibn Sina was extremely bright, a voracious reader who loved to learn and was fortunate to have the best teachers. He memorized the Qur'an by the age of ten and completed his medical studies at sixteen. He spent his life traveling, treating the sick, seeking knowledge through research, and writing about his discoveries. He came up with new theories in the fields of physics, chemistry, astronomy and education. His most famous work is The Canon of Medicine, a collection of books that were used for teaching in universities across the Islamic world and Europe for centuries. Ibn Sina's story, told in the first person and beautifully illustrated, provides a fascinating glimpse into the life of one of the great intellects of the past.
