THE UNIQUE EVONY AGE 1 HANDBOOK GUIDE Nghia Nguyen

This is a unique guide published September 2012, (Updated) I have played Evony for a long time, and I have learned a great deal of information that is accurate. This guide is for the seasoned pro and the nub's and everyone in between. If you just hope to pick up some secrets few know about or wish to become a pro. This will teach you how to be top 50 in the first weeks of the server while spending nothing.

In this guide I explain everything to you and reveal all the secrets you never hear about, and even most top players don't know. If you coin very little, it will teach you how to compete and beat the heavy coiners, if you heavy coin it will teach you how to maximize that advantage.

It will teach you how to transfer heroes (NO LONGER WORKS 9/22/12) without having to persuade. It will teach you how to medal farm 15-20 medals/day with no troop loss and little effort, (I also explain exactly how the medal drop system works, with that knowledge you will understand why most people think medal farming is tedious, when really they are just doing it wrong because they are using information found on the internet about old mechanics that have been changed. You will never have to buy a medal box again and be Furstin with no coins before day 10) it will teach you how to get huge amounts of resources from the market, it will teach you another way to make up to 8 billion/lumber/day/net mid server using a secret method. That number is not a typo, I mean BILLION and I will show you exactly how to do it.

The guide also delves DEEP into battle mechanics, on how each unit works on offense and defense and what they do in every situation. With that knowledge you will be better than dxcalc and will know how to break any defense while exploiting weakness's. It will even teach you how to sell NPC10's early server and heroes mid to late server for real money, you can then use that cash for coins or cash it out. That's only the beginning, this book is the culmination of years of analyzing while playing at the highest levels and I hold nothing back in it!

This is the ultimate guide regardless of who you are in Evony. You will pick up information that will help you and that you cannot find on the internet. It will make you a top 50 player even without coining, if you already are it will make you that much better. The information in this guide is the ultimate edge. This is not like the other old guides I have seen or ones written by nubs, this truly is the ultimate guide written by someone you have probably seen on your server in the #1 spot. It is not filled with general information you can find on the internet. It is designed to change your mindset and introduce concepts that will change your thinking and greatly improve your gameplay. Along with solid tested knowledge and secrets that will elevate your play to the highest levels. For half the investment of a package, you get this guide that I'm confident will help you more than 20 packages would.

The table of contents are.

1. Introduction
2. Getting Started
3. Marketplace
4. Medal Farming
5. How to keep ahead of the pack
6. Hero's +Heroe Transfer Secret
7. Complete Battle Mechanics

8. Lumber Secret
9. Selling NPC's/Heroes for CASH
10. BOB
11. Pro Tips
12. Conclusion

The book consists of 20 pages. There's no filler, and again I hold nothing back. I would be surprised if over .1% of Evony players know all the secrets, concepts, and mechanics in this book. Now you can be one of the ELITE.

Makes a great gift for yourself or for that Evony player in your life.

The secrets in this guide have never been released to the general population, they have been guarded, used and passed around person to person only at the highest levels of the game. I honestly believe that if enough people own this book it will change Evony forever. If only a few do it will just add your membership to the ranks of the Elite
