Music Similarity and Retrieval: An Introduction to Audio- and Web-based Strategies (The Information Retrieval Series) Peter Knees, Markus Schedl

This book provides a summary of the manifold audio- and web-based approaches to music information retrieval (MIR) research. In contrast to other books dealing solely with music signal processing, it addresses additional cultural and listener-centric aspects and thus provides a more holistic view. Consequently, the text includes methods operating on features extracted directly from the audio signal, as well as methods operating on features extracted from contextual information, either the cultural context of music as represented on the web or the user and usage context of music.

Following the prevalent document-centered paradigm of information retrieval, the book addresses models of music similarity that extract computational features to describe an entity that represents music on any level (e.g., song, album, or artist), and methods to calculate the similarity between them. While this perspective and the representations discussed cannot describe all musical dimensions, they enable us to effectively find music of similar qualities by providing abstract summarizations of musical artifacts from different modalities.

The text at hand provides a comprehensive and accessible introduction to the topics of music search, retrieval, and recommendation from an academic perspective. It will not only allow those new to the field to quickly access MIR from an information retrieval point of view but also raise awareness for the developments of the music domain within the greater IR community. In this regard, Part I deals with content-based MIR, in particular the extraction of features from the music signal and similarity calculation for content-based retrieval. Part II subsequently addresses MIR methods that make use of the digitally accessible cultural context of music. Part III addresses methods of collaborative filtering and user-aware and multi-modal retrieval, while Part IV explores current and future applications of music retrieval and recommendation.>

From reader reviews:

Kelley Thornton:

Are you kind of active person, only have 10 or even 15 minute in your morning to upgrading your mind skill or thinking skill possibly analytical thinking? Then you are having problem with the book when compared with can satisfy your short time to read it because this time you only find guide that need more time to be study. Music Similarity and Retrieval: An Introduction to Audio- and Web-based Strategies (The Information Retrieval Series) can be your answer since it can be read by a person who have those short time problems.

Mary Davis:

The book untitled Music Similarity and Retrieval: An Introduction to Audio- and Web-based Strategies (The Information Retrieval Series) contain a lot of information on it. The writer explains the woman idea with easy approach. The language is very straightforward all the people, so do certainly not worry, you can easy to read that. The book was written by famous author. The author provides you in the new age of literary works. It is easy to read this book because you can read more your smart phone, or gadget, so you can read the book inside anywhere and anytime. If you want to buy the e-book, you can start their official web-site in addition to order it. Have a nice learn.

Barbara Baker:

Is it a person who having spare time then spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Music Similarity and Retrieval: An Introduction to Audio- and Web-based Strategies (The Information Retrieval Series) can be the response, oh how comes? The new book you know. You are consequently out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these ebooks have than the others?

Donna Bledsoe:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from your book. Book is written or printed or highlighted from each source that will filled update of news. On this modern era like currently, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just seeking the Music Similarity and Retrieval: An Introduction to Audio- and Web-based Strategies (The Information Retrieval Series) when you desired it?
